Muhammad Muzammal

Front End Web Developer

Smart worker and analytical problem solver with 1 year experience as Front-End Developer (Web) possessing leading development skills like: React.js, Bootstrap, Material UI, Vanilla Js, HTML and CSS. I am a quick learner always looking up for new challenges, willing to work hard and continuously improve my skills as a full stack web developer. Seeking for a better opportunity that will help me grow my skills in both technical as well as professional context

Work Experience

Front End Web Developer

`Nov 2022 - Present` **Power Information Technology Company**

Job Responsibility

- Analyzing client requirements and developing software solutions that meet those requirements.
- Designing, developing, testing, maintaining, and supporting software solutions using variety of technology stacks JavaScript,HTML, React, CSS, Material UI that seamlessly integrate with other systems.
- Designing and developing responsive user interfaces that are compatible across multiple screen resolutions and browsers.
- Writing clean, maintainable and modular code following best software development practices

Projects

MEPCO Smart - Web Portal   (https://117.20.28.178:8040/)

React.js - Material UI - SCSS - Typescript

The Mepco smart portal is a web interface developed as part of the Power Sector Improvement Activities (PSIA). It provides power consumers with smart monitoring features such as load profile, power outage information, consumption trends, and payment trends. The portal utilizes Highcharts.js to display interactive graphs and incorporates Formik and Yup for requesting various power services like new connections, attribute changes, meter replacements, due date extensions, and more.

e-Operations - Web Portal   (https://117.20.28.178:8037/)

React.js - Material UI - SCSS - Javascript - Js pdf

The e-Operations web portal, a component of the Power Sector Improvement Activities (PSIA), served as a role-based interface for field operations. It facilitated workflow processing for services initiated through MEPCO Smart. The portal integrated with other solutions, like CCMS and Billing, through APIs and featured an interactive dashboard with hierarchical statistics for MEPCO's divisions. Notably, it included the E-File, a comprehensive digital document tracking connection history and all services throughout its lifespan.

Citizen Monitor - Web Portal   (https://117.20.28.178:8037/)

React.js - Tanstack Table - SCSS - Material UI

An admin portal to display hierarchical dashboard stats of theft case along with role based operations on the submitted electricity theft case developed during the anti-theft campaign launched by ministry of energy (MoE) power division of Pakistan.

Portfolio Website - Practice   (https://mmuzammalportfolio.vercel.app/)

React.js - SCSS - Material UI

I've crafted a dynamic portfolio site showcasing my proficiency in React, MUI, and SCSS. From a well-designed header to detailed sections on services, experience, portfolio, and testimonials, my site exemplifies a seamless user experience. Additionally, I've implemented a secure login form for user interaction. Explore my work and expertise, wrapped up with a professional touch in the footer.
